SUMMARY

Full-stack engineer building scalable web applications using React.js, Next.js, and Node.js. Turning ideas into clean, functional products, from designing APIs to crafting smooth user interfaces. Currently working as a full-stack engineer on **Squadly**, a SaaS platform that helps service businesses handle their **scheduling, bookings, and admin** work

PROFESSIONAL EXPERIENCE

<u>Squadly</u> 	Sep 2024 – Present Australia
Full Stack Engineer - Developed a scalable web app using the NX monorepo architecture. - Improved mailing feature performance by implementing an IndexedDB caching layer. - Built and integrated scalable backend features within a microservices architecture.	
Tbox Solutionz	May 2024 – Sep 2024 Pakistan
Associate Software Engineer - Built full-stack applications using MongoDB, Express.js, React.js, and Node.js. - Designed RESTful APIs with Express.js for seamless frontend-backend communication. - Improved application efficiency by implementing a modular backend architecture.	
Zak Studio	Nov 2023 – May 2024 Pakistan
Junior Full Stack Developer - Developed Next.js & TypeScript applications for the e-commerce sector. - Created a responsive and visually appealing UI with ShadCN UI and Tailwind CSS. - Improved SEO and load time performance using Next.js SSR and CSR techniques.	

PROJECTS

Resident Whisper

- Developed a **private community platform** for building owners using **Next.js** and a responsive and accessible design with **Tailwind CSS** and **ShadCN**.
- Developed an admin **dashboard** to manage residents and building directories and monitor community engagement.
- Developed a **platform** that enables verified residents to securely share updates, post news, and communicate within their specific building networks.
- Designed scalable RESTful APIs to power the private community platform using **Node.js** and **Express**.
- Implemented secure authentication using **Passport.js** and **JWT** and handled **AWS S3** document uploads and automated email notifications via **Resend**.

E-Medical Certificate

- Built a platform enabling patients to request medical certificates from **PMDC-certified doctors**.
- Implemented form handling with React-Hook-Form and validation using Zod.
- Managed global state using Context API and used Tailwind for styling.
- Integrated Axios for API communication and implemented **Easypaisa** for secure online payments.

Business Majlis

- Built a **business networking platform** enabling professionals to connect, engage, and grow their network in a community environment.
- Built type-safe, **reusable** components using React.js and TypeScript with React Hook Form and Zod validation, implementing lazy loading and code splitting to optimise bundle size
- Developed a **real-time chat** and **dashboards** while monitoring and improving **Core Web Vitals** throughout development to deliver a high-performance, responsive UI across all devices.

EDUCATION

Bachelor's in Software Engineering National University of Sciences and Technology (NUST)	Oct 2020 – Jul 2024 Pakistan
---	---------------------------------

SKILLS

Frontend — React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Shadcn UI, Redux Toolkit, React Query, React Hook Form, Radix UI, Framer Motion
Backend — Node.js, Express.js, RESTful APIs, Modular Monolithic, Microservices, Prisma ORM, Mongoose, Sequelize, JWT, Passport.js, Redis, Puppeteer, MongoDB, MySQL, PostgreSQL
Cloud Tools — AWS (S3, SES), Git, GitHub, CI/CD, Resend, NX Monorepo, Turbo Monorepo, Postman, Vitest, bun, pnpm, npm.
